

ADVOCATES
FOR HIGHWAY
& AUTO SAFETY

March 6, 2026

The Honorable David C. Farnsworth, Chairman
The Honorable John Kavanagh, Vice-Chairman
Senate Committee on Appropriations, Transportation and Technology
Arizona Senate
1700 West Washington Street
Phoenix, Arizona 85007

Dear Chairman Farnsworth and Vice-Chairman Kavanagh:

Advocates for Highway and Auto Safety (Advocates), an alliance of consumer, safety, medical, public health and law enforcement groups and insurance companies working together to pass highway and auto safety laws that prevent crashes, save lives, reduce injuries, and contain costs, urges you to oppose House Bill (HB) 2003. This measure would reduce the minimum age for instruction permits by six months to 15 years old. In doing so, it will erode the graduated driver licensing (GDL) law and threaten the safety of novice teen drivers and all who share the roads with them.

Traffic fatalities in Arizona have increased over the past decade. In 2024, there were an overall estimated 1,250¹ traffic fatalities in Arizona according to the National Highway Traffic Safety Administration (NHTSA), which is a 39 percent upsurge since 2015.² The number of drivers ages 15-20 involved in fatal crashes went up 119 percent from 2014 to 2023.³ Especially considering this deadly upturn, the state's GDL law should be improved rather than weakened.

Teenagers drive less than all but the oldest drivers, yet their number of crashes and crash deaths are disproportionately high.⁴ Per mile driven, teen drivers have crash rates nearly four times higher than drivers aged 20 and older.⁵ According to the Centers for Disease Control and Prevention (CDC), teens are more likely to misjudge dangerous situations or to not be able to recognize hazardous situations. Teens tend to speed, follow too closely, and underestimate speed and stopping distances. Moreover, compared with other age groups, teens have the lowest rate of seat belt use.

In addition to preventing fatalities and injuries, GDL laws save states money. The NHTSA estimated the economic cost of police-reported crashes involving drivers between 15 and 20 years old in the U.S. was \$40.8 billion in 2002.⁶ When adjusted for inflation, that amounts to \$74.9 billion in 2026 dollars.⁷

Conversely, we support the provisions of HB 2003 which raise supervised driving (SD) requirements and the length of time an instruction permit must be held. However, the impact of increased SD requirements is mitigated by applying only to drivers who do not complete a driver's education program. We cannot support these changes in a context where the minimum instruction permit age is decreased by six months. Based on Insurance Institute for Highway Safety (IIHS) research, the best practices for GDL include a minimum permit age of 16 and a minimum intermediate license age of 17. Delaying the minimum age for obtaining a learner's permit was associated with lower fatal crash rates for 15- to 17-year-olds combined, and a one-year delay (e.g., from age 15 to 16) reduced the fatal crash rate by 13 percent.⁸ Rather than exacerbate the dangers associated with teen driving, we urge you to instead consider making these changes and upgrading to primary enforcement of GDL laws to enhance safety.

With well over 1,000 annual traffic fatalities in Arizona, we urge you to reject HB 2003. Thank you for your consideration.

Sincerely,

Catherine Chase, President

cc: Senate Committee on Appropriations, Transportation and Technology members
